

DMUG

April Member Meeting - 4/15/2017

Google's OneBox is the result you get when Google magically knows the answer to a search you perform. Above the normal search results, Google gives you the definitive answer to your search—or a miniature, interactive tool to continue your search. These are different from **search operators** that help you narrow your search. With the OneBox results you can quickly find the weather, learn what a medication is, peek at a musician's discography, and even find release dates for movies. With this power you can find the information you're looking for almost instantly, and you'll look like the smartest person in the room for knowing the results before anyone else.

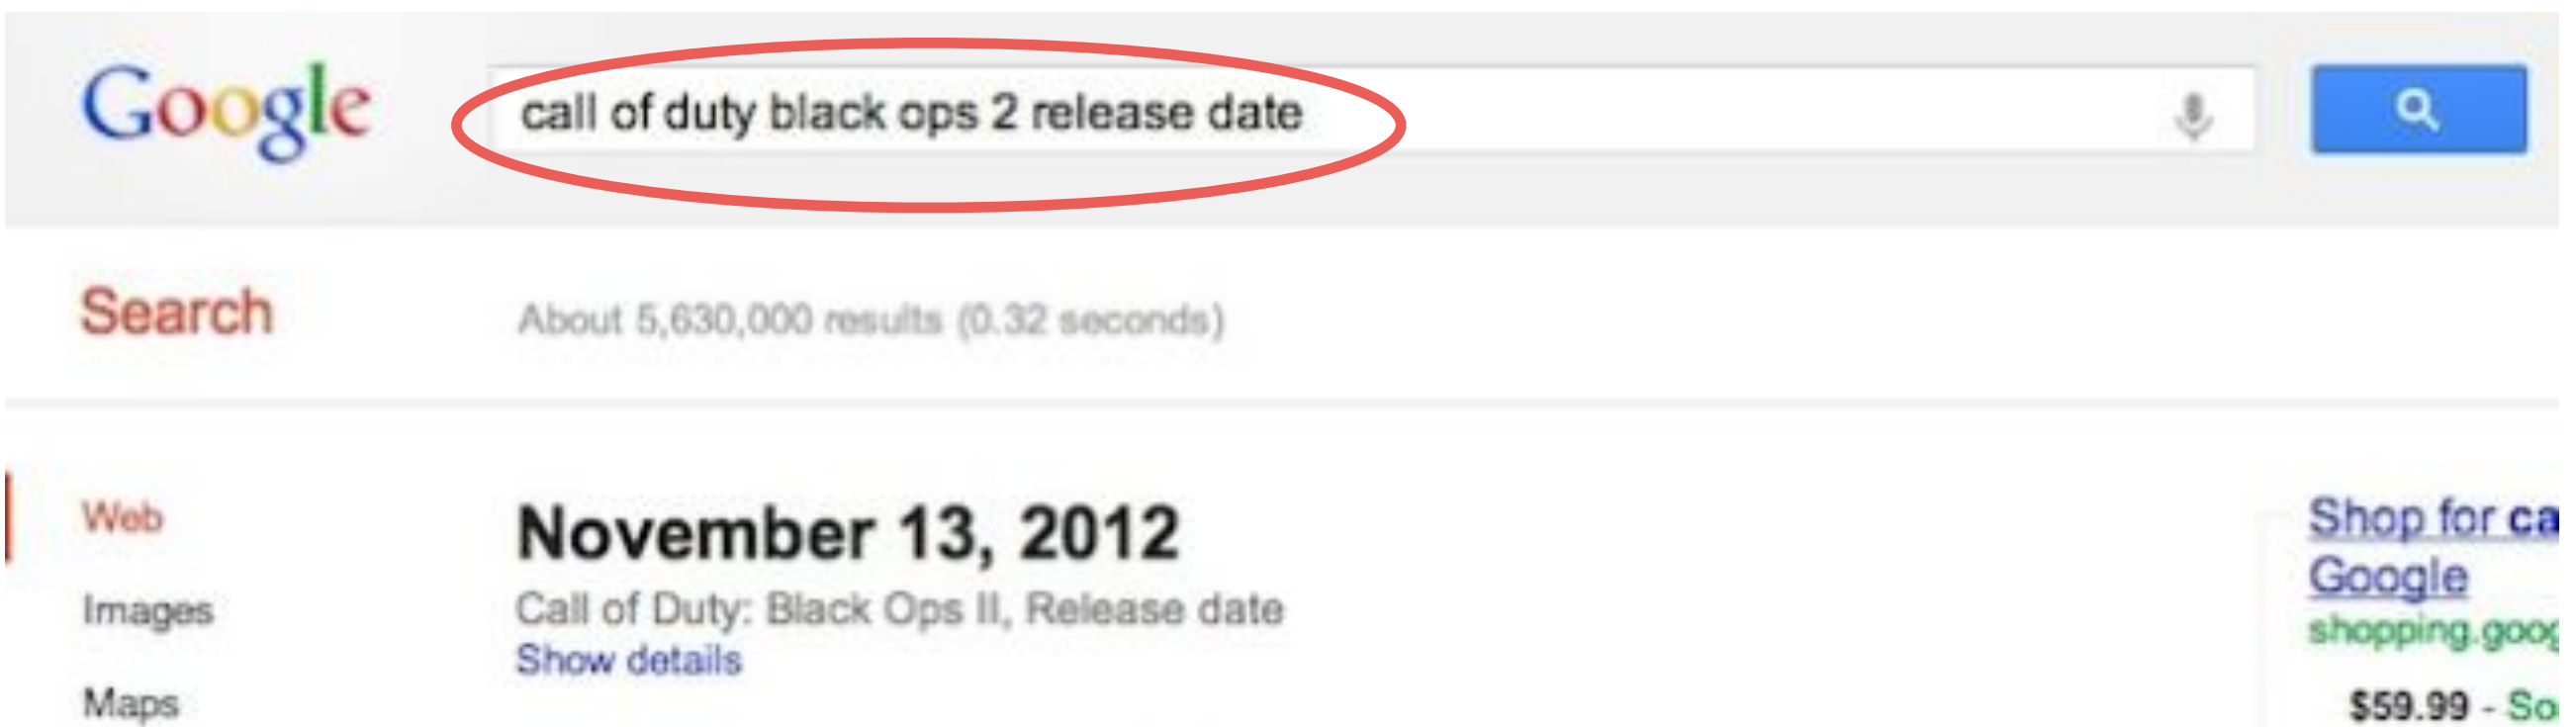

Get Instant Artist Discographies and Filmographies

Want to take a quick look at a musician's discography? Or maybe just a list of all the films from a director or actor? Just type "[**artist**] [**movies or albums**]" into the search box and you get an instant list of what they've done. For musicians, you can also search "[**artist**] **songs**" to get a list of their popular songs.

Find Release Dates for Movies, Games, and More

Want to know when a game or movie is getting released? Type "[name of movie or game] release date" and you get the result. Movies automatically show the theatrical release date, but you can add "dvd" to get the DVD or Blu-Ray release. This search works for both upcoming and past releases.

The screenshot shows a Google search interface. The search bar contains the text "call of duty black ops 2 release date", which is circled in red. To the left of the search bar is the Google logo. To the right is a blue search button with a magnifying glass icon. Below the search bar, the word "Search" is displayed in red, followed by the text "About 5,630,000 results (0.32 seconds)". On the left side, there are links for "Web", "Images", and "Maps". The main content area displays the result "November 13, 2012" in large bold text, with "Call of Duty: Black Ops II, Release date" and a "Show details" link below it. On the right side, there is a shopping result snippet for "Shop for ca", "Google shopping.google", and a price of "\$59.99 - So".

Find Current Movie Showtimes

To quickly find movie showtimes in your area, type "[name of movie] [zip code]" into the search box and you get results for theaters close to you. If you don't have a particular movie in mind, you can also just type "movie [zip code]" and get a list of everything playing in your area (if Google knows your location you can just type "movie").

The screenshot shows a Google search interface. The search bar contains the text "the avengers" and is highlighted with a red oval. Below the search bar, the word "Search" is displayed in red, followed by the text "About 119,000,000 results (0.20 seconds)". On the left side, there is a vertical menu with links to "Web", "Images", "Maps", "Videos", "News", "Shopping", and "More". The main content area displays the search results for "Marvel's The Avengers showtimes for Denver, CO". It includes a movie poster for "The Avengers" and a list of theaters with their showtimes. The theaters listed are "UA Denver Pavilions 15" and "AMC Cherry Creek 8". The showtimes are "7:05 - 10:15pm" and "6:45 - 10:00pm" respectively. There is also a "Trailer" button and a link to "Show more theaters". On the right side, there is a section titled "The Avenger" with a movie poster and the text "2012 film". Below this, there is a link to "en.wikipedia..." and the text "Release date: M".

Instantly Find Simple Factual Information

For any search you might want to do that includes a definitive fact you can often search for the answer directly. These include dates like "[name of famous person] death," certain stats like, "[mountain] elevation," or even population with, "[city] population." Essentially, if you're searching for anything that has a number attached to it, you can often search for it directly.

Find the Score of Any Current Sports Game

Whether you're a sports nut or you just want to know the best time to avoid going near a stadium, you can search nearly any sports team name to get the current score, and upcoming games. You only need to type in the name. For instance, "**colorado rockies**" gets you the recent scores, record, standings, win percentage, and upcoming games.

The screenshot shows a Google search interface with the query "colorado rockies" entered in the search bar. The search results page displays the following information:

Get a Five Day Forecast of the Weather in Any City

Need to get a quick weather report before you head out for vacation? Search "**weather [city name]**" and you get a five day forecast for the city you search for.

The screenshot shows a Google search interface. The search bar contains the text "abu dhabi weather", which is circled in red. To the right of the search bar is a blue search button with a magnifying glass icon. Below the search bar, the text "Search" is displayed in red, followed by "About 19,700,000 results (0.18 seconds)". On the left side, there is a vertical menu with links to "Web", "Images", "Maps", "Videos", and "News". The main content area displays the weather for Abu Dhabi - United Arab Emirates. It features a large sun icon, the temperature "95°F | °C", and the text "Clear", "Wind: N at 13 mph", and "Humidity: 71%". To the right, there is a table showing the five-day forecast for Wednesday, Thursday, Friday, and Saturday. Each day has a weather icon and temperature range. Below the table, there is a link to "Detailed forecast: The Weather Channel - Weather Underground - AccuWeather".

Current Weather	Wed	Thu	Fri	Sat
 95°F °C Clear Wind: N at 13 mph Humidity: 71%	 111° 86°	 106° 86°	 109° 86°	 104° 86°

Detailed forecast: [The Weather Channel](#) - [Weather Underground](#) - [AccuWeather](#)

Find the Current Time in Any City

Time zone conversions are a pain, but thankfully Google does them for you. Search "**time [city name]**," and you get current time in any city. If you're looking for more results, type in "**time [country name]**" to get a full list of the timezones in any given country. While you're at it, you can also get the time of the sunrise or sunset by typing "**sunrise [city name]**," or "**sunset [city name]**."

Find Upcoming Dates for Holidays and Events

When you need to quickly see what day of the week a holiday lands on, or when a big event starts (like the **Presidential Election**, the **Super Bowl**, **Olympics**, etc), search for "[year] [holiday name or event title]."

Calculate Almost Anything

Google's calculator is surprisingly robust, and all you need to do is enter a calculation into the search box. " $5+2$ " works just fine, but you can also use advanced phrases like " $\cos(\pi) + 4$." If you want a graph, simply add "graph" before the equation. You can also [search for "calculator"](#) to bring up the calculator directly.

The screenshot shows the Google search interface. The search bar contains the text "cos(pi) + 4", which is circled in red. Below the search bar, the word "Search" is displayed in red, followed by the text "About 73,300,000 results (0.12 seconds)".

On the left side, there is a vertical menu with the following items: "Web", "Images", "Maps", "Videos", "News", "Shopping", "Discussions", and "More". Below this menu, it says "Denver, CO" and "Change location".

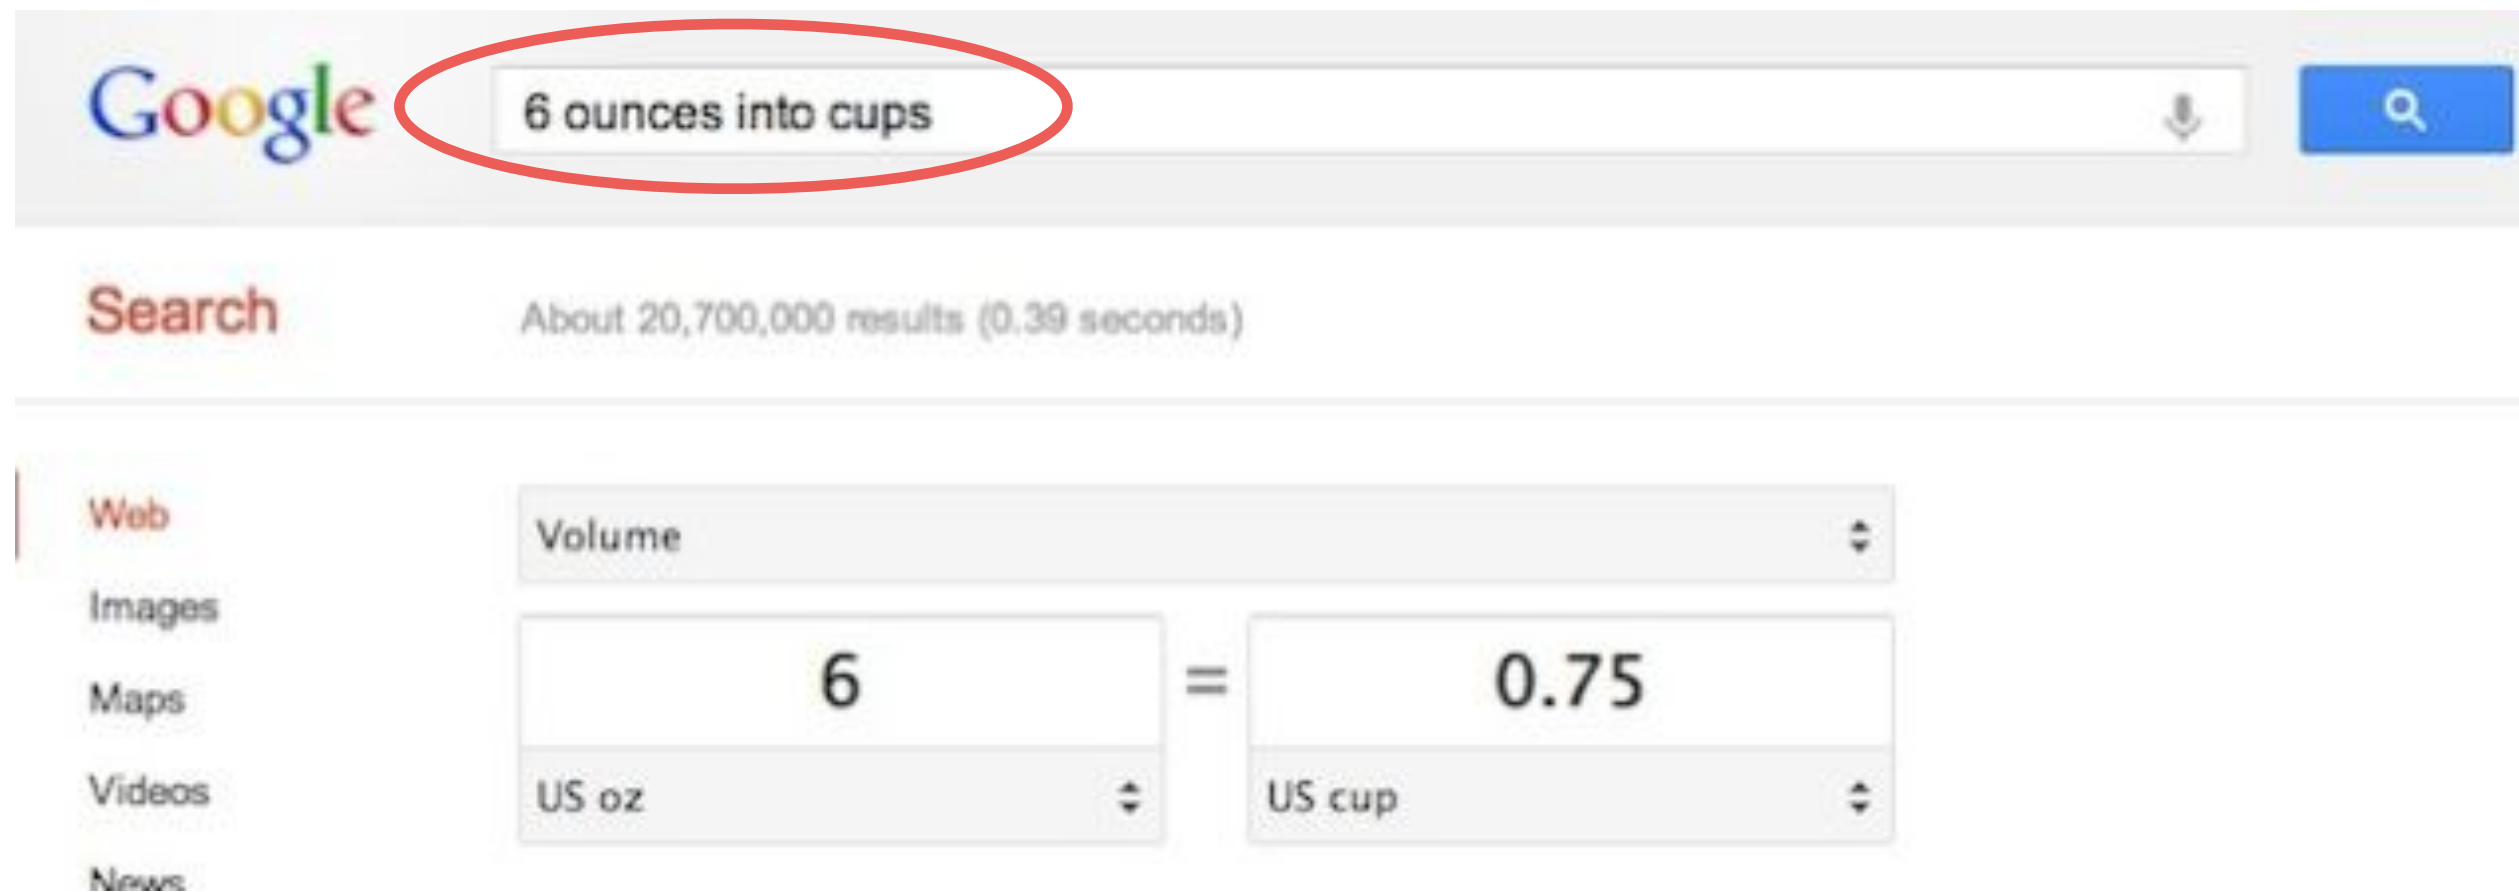

The main content area displays the search results for the calculator. At the top right, it shows the expression "cos(pi radians) + 4 =". Below this, there is a large input field containing the number "3".

Below the input field is a calculator interface with a grid of buttons. The buttons are arranged in five rows and seven columns:

Rad		x!	()	%	AC
sin ⁻¹	sin	√	7	8	9	÷
cos ⁻¹	cos	ln	4	5	6	x
tan ⁻¹	tan	log	1	2	3	-
π	e	x ^y	0	.	=	+

Convert Units of Measure

Unit conversions are handy when you're cooking or building just about anything. The search in Google is easy. Type "[number] [unit] into [unit]." For instance, you can convert knots into miles per hour like this, "6 ounces into cups." It works with any type of measurement, including digital storage ("5 mb into kb"). If you need to bring up the unit converter directly, you can do so by searching [unit converter](#).

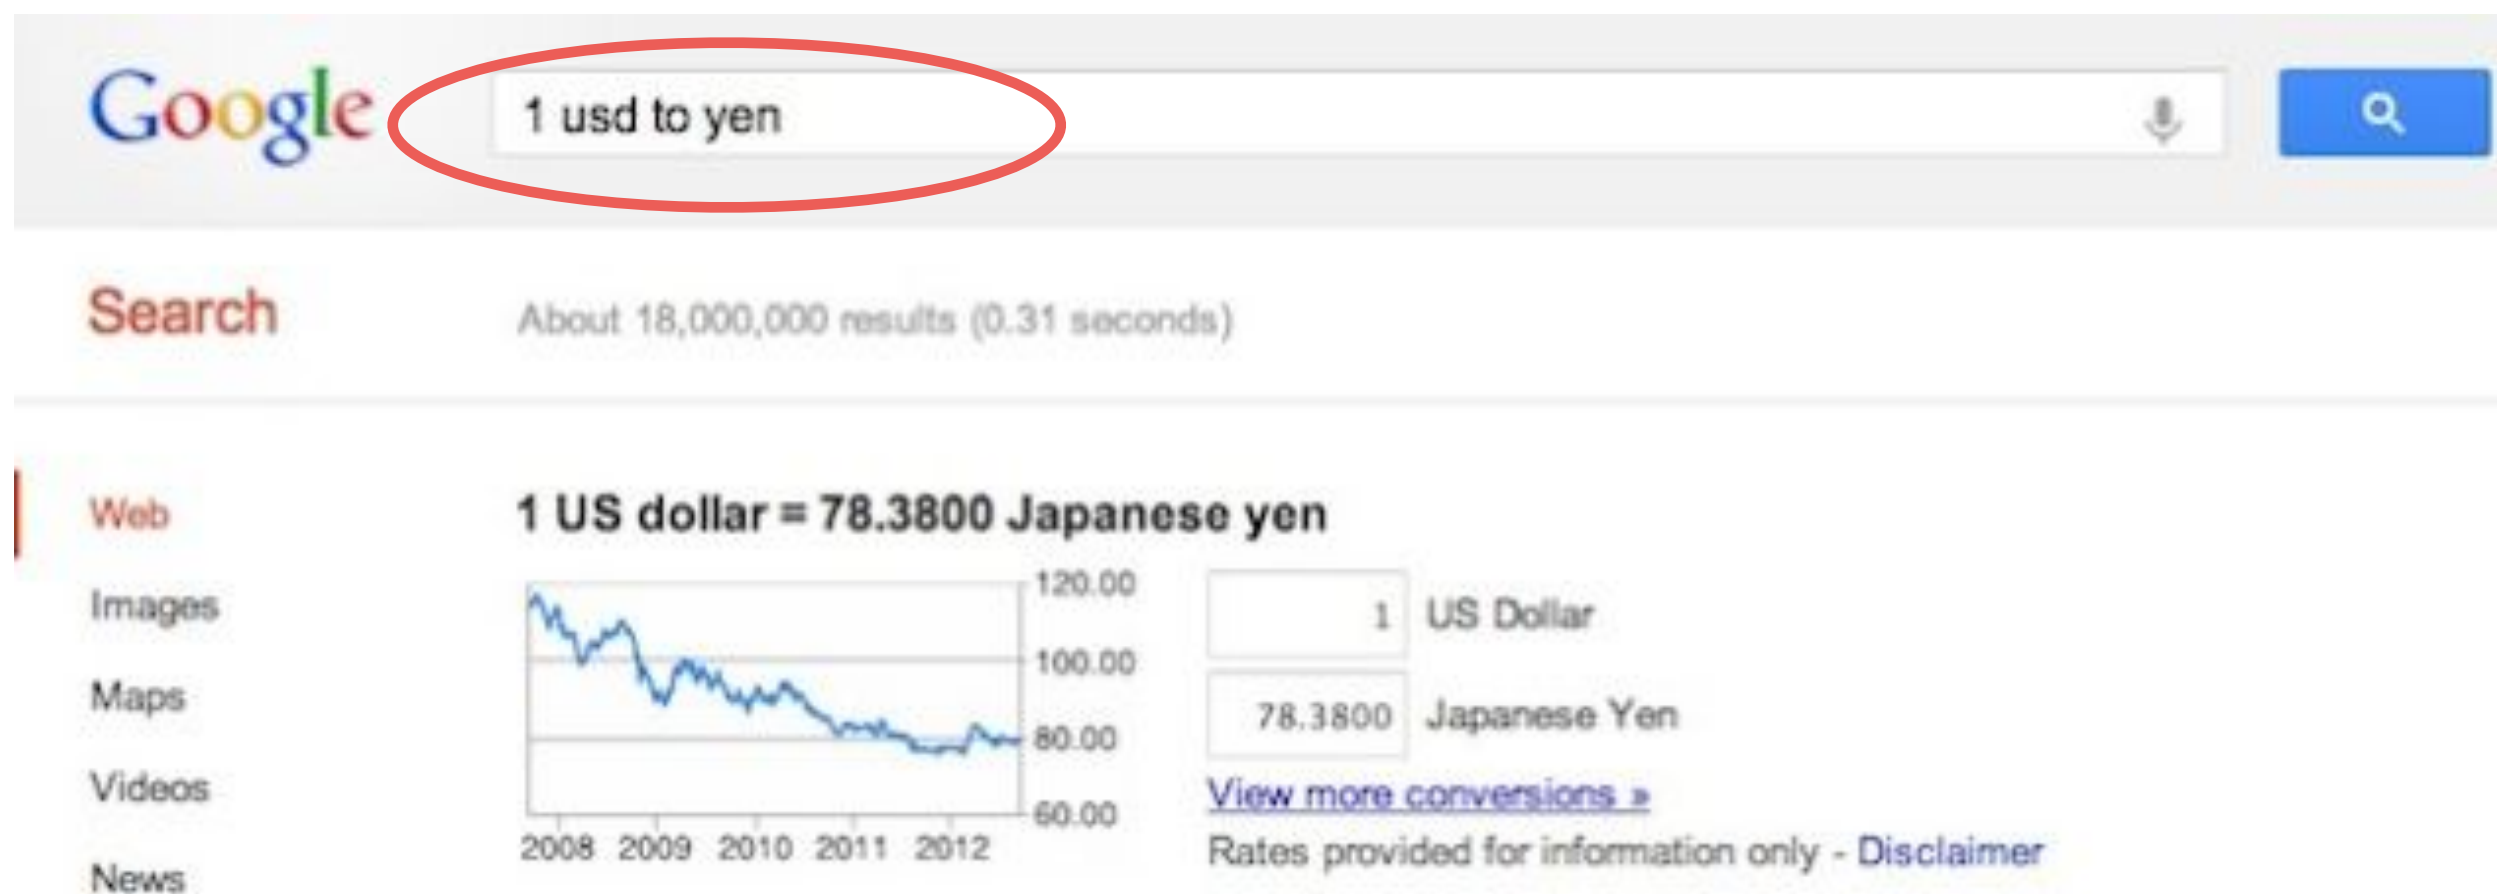

The screenshot shows a Google search interface. The search bar contains the text "6 ounces into cups", which is circled in red. Below the search bar, the word "Search" is displayed in red, followed by the text "About 20,700,000 results (0.39 seconds)". On the left side, there is a vertical menu with links to "Web", "Images", "Maps", "Videos", and "News". The main content area displays a unit conversion result for "Volume". It shows the number "6" in a box, followed by an equals sign, and then the number "0.75" in a box. Below these boxes, the units "US oz" and "US cup" are displayed in separate boxes, each with a dropdown arrow.

Volume		
6	=	0.75
US oz		US cup

Convert Currency

Need to get an up-to-date currency conversion? Google's one of your best choices, and it's as simple as typing "[number] [currency] to [currency]." For instance, to get the conversion rate of US dollars into Yen, type, "1 usd to yen."

Check Stock Prices

When you need to check the status of your stocks, search Google for the shortened stock name. For example, to find Facebook's current price, search "**FB**." If you're not sure of the stock's name, you can also use "[name of company] stock."

Find Word Definitions and Synonyms

If you want to quickly find the definition, synonyms, or pronunciation of a word, all you do is **type the word** into the search box. For many words, Google will automatically pull up a quick definition, pronunciation, and a list of common synonyms. If it doesn't, type "define" before the word.

The screenshot shows a Google search interface. The search bar contains the word "exacerbate", which is circled in red. To the right of the search bar is a microphone icon and a blue search button with a magnifying glass. Below the search bar, the word "Search" is displayed in red, followed by the text "About 7,130,000 results (0.17 seconds)". On the left side, there is a vertical menu with options: "Web", "Images", "Maps", and "Videos". The "Web" option is selected, indicated by a red vertical bar. The search results for "exacerbate" are displayed on the right. The word is shown in bold as "ex·ac·er·bate" with its phonetic transcription "/ɪɡˈzæsərbāt/" and a speaker icon. Below the word, the definition is given: "Verb: Make (a problem, bad situation, or negative feeling) worse." Synonyms listed are "aggravate - irritate - exasperate - sharpen". At the bottom, there is a link for "More info »" followed by a list of sources: "Dictionary.com - Answers.com - Merriam-Webster - The Free Dictionary".

Translate Words Instantly

Google Translate is great for translating large chunks of text. You can translate single words right from the search bar by typing "translate [word] into [language]." For instance, to translate "monster" from English to Spanish, type, "**translate monster into spanish**." You can also translate simple sentences. For instance, "**translate the monster ate my neighbor into spanish**," will result in "el monstruo se comió mi vecino."

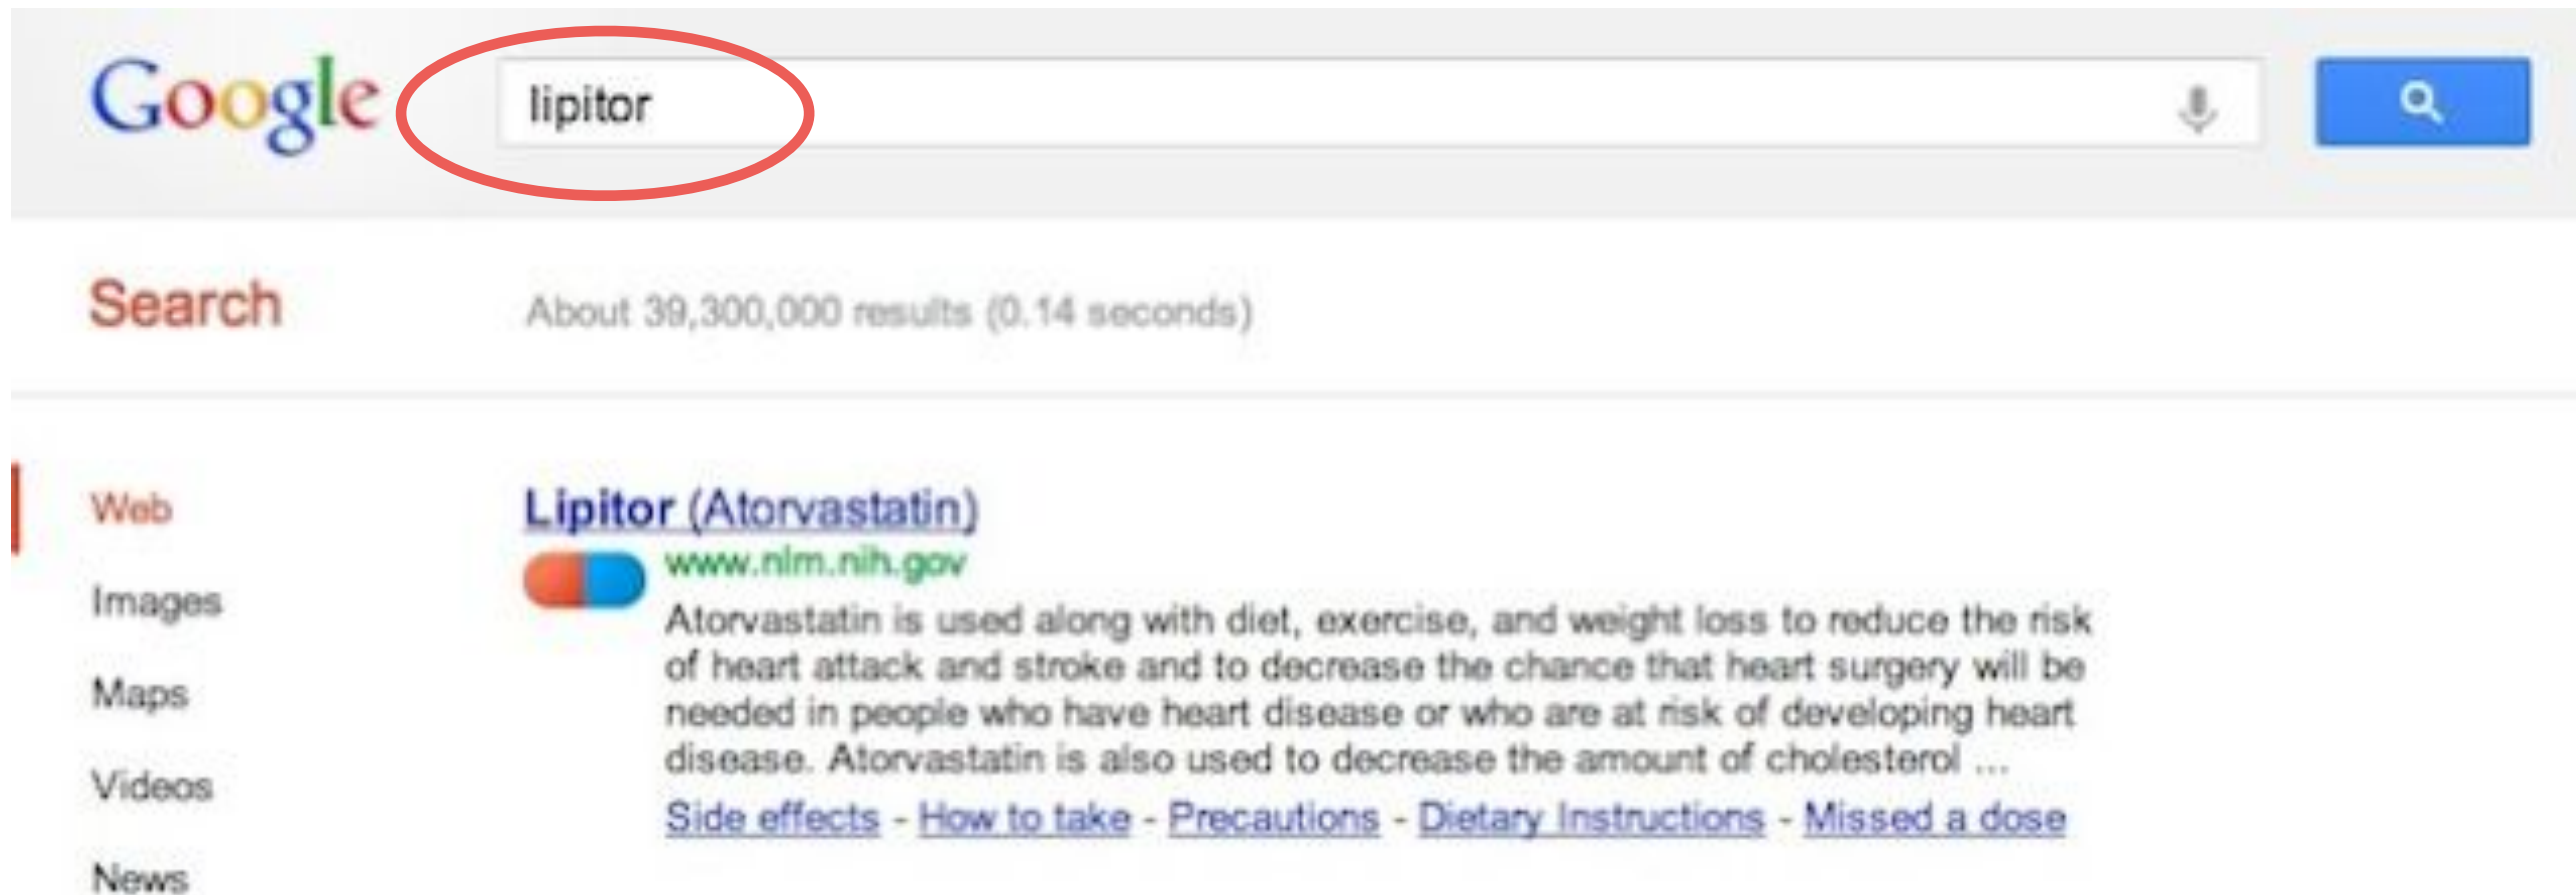

Search Basic Health Conditions

When you type in any health condition (like **asthma**, **psoriasis**, etc) into Google, you get a quick synopsis of the condition from the U.S. National Library of Medicine. If you don't know the condition, you can also type in symptoms. For instance, "**abdominal pain on right side**" pulls up a list of possible conditions, including appendicitis, ectopic pregnancy, and kidney stones.

Find Information on Medications

Search for any medication name (like **Ambien**, **Lipitor**, etc) and Google will pull up a quick description with links to side effects, directions, precautions, and more.

The screenshot shows a Google search interface. The search bar contains the word "lipitor", which is circled in red. To the right of the search bar is a microphone icon and a blue search button with a magnifying glass. Below the search bar, the word "Search" is displayed in red, followed by the text "About 39,300,000 results (0.14 seconds)". On the left side, there is a vertical menu with the following options: "Web", "Images", "Maps", "Videos", and "News". The "Web" option is selected, and a red vertical bar is next to it. The search results for "Lipitor (Atorvastatin)" are displayed. The title "Lipitor (Atorvastatin)" is in blue. Below it is a small icon of a red and blue pill, followed by the URL "www.nlm.nih.gov" in green. The main text describes the use of Atorvastatin: "Atorvastatin is used along with diet, exercise, and weight loss to reduce the risk of heart attack and stroke and to decrease the chance that heart surgery will be needed in people who have heart disease or who are at risk of developing heart disease. Atorvastatin is also used to decrease the amount of cholesterol ...". At the bottom, there are several blue links: "Side effects", "How to take", "Precautions", "Dietary Instructions", and "Missed a dose".

Hunt Down Information on Local Restaurants and Businesses

Looking for a new restaurant to check out in your area? Type in "[type of restaurant] [your zip code]" and you get a list of every place close to you, including review scores. You'll also see a map on the right side so you can quickly flip through places not in the top results.

The screenshot shows a Google search interface. The search bar contains the text "mexican restaurant 80205", which is circled in red. Below the search bar, the word "Search" is displayed in red, followed by the text "About 59,100 results (0.34 seconds)". On the left side, there is a vertical menu with links to "Web", "Images", "Maps", "Videos", "News", "Shopping", and "More". The main content area displays the title "Places for mexican restaurant near Denver, CO 80205" in blue. Below this title, there are three restaurant listings, each with a location pin icon, the restaurant name, website, and review score. To the right of the listings, there are three location pins labeled A, B, and C, each with an address and phone number. On the far right, there is a partial view of a map titled "Map for me".

Get Instant Drive Times (and Directions) Between Addresses

Google Maps is great, but you don't actually have to navigate to the main page to get directions. If you need to get a quick time estimate or overview of the drive, type "[current address] to [new address]" and Google will give you a quick look at the directions and drive time.

The screenshot shows a Google search interface. The search bar contains the text "from 1600 16th street denver, co to 5200 colfax ave", which is circled in red. Below the search bar, the word "Search" is displayed in red, followed by "About 365,000 results (0.46 seconds)". On the left side, there is a vertical menu with links: "Web", "Images", "Maps", "Videos", "News", "Shopping", and "More". The main content area displays a map of Denver with a blue line indicating the driving route between two points. Point A is marked with a green circle and labeled "A", and Point B is marked with a green circle and labeled "B". To the right of the map, the text "Driving directions" is displayed in blue, followed by "maps.google.com - Print". Below this, the starting point is listed as "A 1600 16th St, Denver, CO 80202" and the destination is listed as "B 5200 W Colfax Ave, Lakewood, CO 80214". The estimated drive time is "10 mins" and the distance is "3.4 mi - W Colfax Ave". The map includes labels for "Edgewater", "Sloan Lake", "Highland", "Aurora", "Lincoln Park", and "Villa Park". The copyright notice "©2012 Google" is visible at the bottom of the map.

Track the Status of Any Flight

You don't have to dig around on an airline's web site to track the status of a flight. All you have to do is type "[airline] [flight number]" into Google and you get instant results from **Flight Stats**. If you want a quick estimate on flight cost, you can also search, "flights from [city] to [city]" for a search of available flights and prices.

The screenshot shows a Google search interface. The search bar contains the text "alaska flight 672", which is circled in red. To the right of the search bar is a microphone icon and a blue search button with a magnifying glass. Below the search bar, the word "Search" is displayed in red, followed by the text "About 44,500,000 results (0.38 seconds)".

On the left side of the results, there is a vertical list of links: "Web", "Images", "Maps", "Videos", "News", and "Shopping".

The main content area displays the title "Flight status for Alaska Airlines 672". Below the title, the status "On-time" is shown in green, followed by the text "departs in 3 hours 46 minutes".

Departure	SEA	3:55pm	Terminal N
	Seattle	Sep 5	Gate 6
Arrival	DEN	7:28pm	—
	Denver	Sep 5	Gate A52

Below the table, it says "Updated 2 minutes ago by flightstats.com - [Details](#)".

Track Your Packages

Paste the **tracking number of a shipment** from USPS, UPS, FedEx, or On-Trac into your Google Search bar and Google automatically figures out which service has it and links you directly to the tracking page.
